AI Image Generation Report

Every AI image (ring preview, grillz preview, custom-enquiry preview) generated on the platform from the first one on 20 March 2026 to 30 October 2026, per client, per model and per month, with the split between images paid from the client's own wallet and images covered by JewlX free credits. Source: the live database (wallet transaction rows), queried on 31 October 2026.

1. Summary

4,989 images have been generated by 18 accounts (15 customer accounts, 3 internal/test accounts). At the client price they were worth **$357.00**. Of that, **$112.43** (31%) was actually taken from client wallets and **$244.60** (69%) was absorbed by JewlX as free monthly credits. Against an estimated supplier cost of $198.34, image generation has so far cost JewlX about **$85.91 more than it collected**.

	All accounts	Customer accounts only	Internal / test only
Accounts	18	15	3
Images generated	4,989	4,413	576
Images fully covered by free credits	3,415	2,954	461
Images fully paid from wallet	1,567	1,454	113
Images split (part free, part wallet)	7	5	2
Charged at client price	$357.00	$317.45	$39.55
Covered by free credits (JewlX cost)	$244.60	$212.87	$31.73
Taken from client wallets (real cash)	$112.43	$104.60	$7.83
Estimated supplier cost	$198.34	$176.37	$21.97
Cash collected minus supplier cost	-$85.91	-$71.77	-$14.14

Three things explain the picture

- **Only 6 of 18 accounts have ever paid anything for images.** GoldMoufDog Custom Grillz & Jewelry and IRIS FINE JEWELS LTD. together account for 90% of all cash collected. The other 12 accounts have generated images only on free credits.
- **The free monthly allowance is $22.50 per account**, which at the current price of $0.072 per image is **312 free images every month for every account**. Only four account-months have ever hit that ceiling (section 4). Everyone else never reaches the point where their wallet is charged.
- **Volume took off in September and October 2026** (1,295 and 2,504 customer images), driven by GoldMoufDog and IRIS. Because each new active account first consumes its free images, the monthly gap between supplier cost and cash collected has widened every month (section 5).

2. Per client, lifetime

Sorted by amount charged. *Free* = images whose whole cost came from the monthly free credits. *Paid* = whole cost from the client's purchased wallet balance. *Split* = the one image each month where free credits ran out part-way. Internal/test accounts are marked.

Client	Images	Free	Paid	Split	Charged	Free cr.	Wallet	Supplier	First	Last
GoldMoufDog Custom Grillz & Jewelry	1,525	671	852	2	$109.80	$48.38	$61.42	$61.00	08-06	10-30
IRIS FINE JEWELS LTD.	1,282	732	548	2	$92.30	$52.78	$39.53	$51.28	07-31	10-30
Vvs Jewelers	497	451	45	1	$35.78	$32.51	$3.28	$19.88	05-22	10-29
JewlX *(internal)*	495	396	98	1	$32.73	$25.39	$7.34	$18.18	03-20	10-30
Jewels of nyc	362	362	0	0	$26.06	$26.06	$0.00	$14.48	08-01	10-30
Danny Diamonds & Co	185	185	0	0	$13.32	$13.32	$0.00	$7.40	10-07	10-30
Joey The Jeweller	170	170	0	0	$12.24	$12.24	$0.00	$6.80	10-01	10-30
Ounce of Ice	121	112	9	0	$8.43	$8.06	$0.37	$4.69	04-10	10-25
Asteri Diamonds	114	114	0	0	$8.21	$8.21	$0.00	$4.56	05-08	10-23
fbe *(internal)*	71	55	15	1	$5.72	$5.24	$0.49	$3.18	04-15	10-16
Henrys Jewelry	70	70	0	0	$5.04	$5.04	$0.00	$2.80	05-16	10-24
Dumoni	25	25	0	0	$1.80	$1.80	$0.00	$1.00	08-06	10-02
Gotham City Jewelers	20	20	0	0	$1.44	$1.44	$0.00	$0.80	05-06	10-24
Jesse the Jeweler	18	18	0	0	$1.30	$1.30	$0.00	$0.72	06-03	10-24
Chrono 47	16	16	0	0	$1.15	$1.15	$0.00	$0.64	07-28	09-11
Lumière Fine Jewelry *(internal)*	10	10	0	0	$1.10	$1.10	$0.00	$0.61	04-08	04-20
Lavora Diamonds	4	4	0	0	$0.29	$0.29	$0.00	$0.16	09-04	10-09
Intrigue Jewelers	4	4	0	0	$0.29	$0.29	$0.00	$0.16	09-01	10-29
Total	**4,989**	**3,415**	**1,567**	**7**	**$357.00**	**$244.60**	**$112.43**	**$198.34**		

Dates are month-day in 2026. Free cr. = covered by free credits, Wallet = taken from the client's purchased balance, Supplier = estimated supplier cost (section 7).

3. Which AI models were used

Model	Images	Share	Charged	Free credits	From wallet	Avg price
google/gemini-3.1-flash-image-preview	4,839	97.0%	$346.64	$238.62	$108.02	$0.072
cached (served from cache, no supplier call)	73	1.5%	$5.17	$2.84	$2.33	$0.071
google/gemini-3-pro-image-preview	71	1.4%	$5.00	$2.95	$2.05	$0.070
google/gemini-2.5-flash-image	6	0.1%	$0.18	$0.15	$0.03	$0.030

Almost everything runs on Gemini 3.1 Flash Image at a flat $0.072 per image. The Pro model was used for a handful of images, mostly in April. The price per image was $0.03 in March, mixed in April while settings were being tuned, and a flat $0.072 from May onwards. Cached results (the same request repeated) are charged to the client at the full price even though there is no supplier call, so the supplier estimate for those 73 images is overstated by about $2.90.

4. How the free credits shape the numbers

Every account receives $22.50 of free credits each month (AI Cost settings, *monthly free credits*, raised from $2.50 to $22.50 by the 8 May 2026 welcome-bonus change). Free credits are spent first; the wallet is only

touched once they are gone. At $0.072 per image that is 312 free images per account per month. The data shows this ceiling exactly:

Client	Month	Images	Free	Paid	Free credits used	From wallet
GoldMoufDog Custom Grillz & Jewelry	2026-10	1,056	312	743	$22.50	$53.53
IRIS FINE JEWELS LTD.	2026-09	660	312	347	$22.50	$25.02
IRIS FINE JEWELS LTD.	2026-10	514	312	201	$22.50	$14.51
Vvs Jewelers	2026-10	358	312	45	$22.50	$3.28

In each of these months the account used precisely 312 free images (= $22.50) and then paid for the rest. No other account in any month came close to the ceiling, which is why 12 accounts show $0.00 from wallet for their entire history. This is the setting that decides how much image cost JewlX absorbs; it is a business decision, not a data error.

5. Month by month

Customer accounts only (internal/test accounts shown separately below). 'Net' is cash taken from client wallets minus the estimated supplier cost for that month.

Month	Active clients	Images	Charged	Free credits	From wallets	Supplier est.	Net
2026-04	1	9	$0.37	$0.00	$0.37	$0.21	$0.16
2026-05	4	111	$7.99	$7.99	$0.00	$4.44	-$4.44
2026-06	6	134	$9.65	$9.65	$0.00	$5.36	-$5.36
2026-07	6	60	$4.32	$4.32	$0.00	$2.40	-$2.40
2026-08	9	300	$21.60	$21.60	$0.00	$12.00	-$12.00
2026-09	13	1,295	$93.24	$60.33	$32.91	$51.80	-$18.89
2026-10	14	2,504	$180.29	$108.97	$71.32	$100.16	-$28.84
Total		**4,413**	**$317.46**	**$212.86**	**$104.60**	**$176.37**	**-$71.77**

Internal / test accounts per month

Month	Accounts	Images	Charged	Free credits	From wallets	Supplier est.
2026-03	1	40	$1.20	$0.00	$1.20	$0.67
2026-04	3	220	$15.60	$8.97	$6.63	$8.67
2026-05	2	86	$6.19	$6.19	$0.00	$3.44
2026-06	1	37	$2.66	$2.66	$0.00	$1.48
2026-07	1	79	$5.69	$5.69	$0.00	$3.16
2026-08	2	35	$2.52	$2.52	$0.00	$1.40
2026-09	2	46	$3.31	$3.31	$0.00	$1.84
2026-10	2	34	$2.45	$2.45	$0.00	$1.36

Per client per month (all accounts)

The full month-by-month record behind the Revenue & Usage page. Blank wallet column means the whole month was free.

6. A data-retention problem found during the cross-check, and what was done

Every AI request writes two rows: a **usage-log** row (ai_usage_logs: who, which feature, which model, when) and a **wallet-transaction** row (how much was charged and from where). As a check, image counts from both sources were compared per client per month. They should match.

They did not. The wallet rows hold 4,990 images; the usage log holds only 2,465. For every month before October 2026 the usage log is empty, and for October it is missing 1 October entirely (IRIS 479 logged vs 514 charged, GoldMoufDog 1,029 vs 1,056).

Cause

A scheduled job in the live database, *monthly-logs-archive-truncate*, runs at 21:00 UTC on the 1st and 31st of each month. It calls the archive-and-truncate-logs function, which zips three log tables into the backup bucket and then **empties them completely**. ai_usage_logs was one of the three. The platform also has a separate, correct 90-day archive for this table (archive_old_ai_usage_logs, which rolls old rows into a monthly summary before deleting them), but it never had anything to work on because the rows were wiped every 30 days.

Effects

- Per-request AI usage history older than about 30 days exists only inside the zipped backup files, not in the database.

- The Revenue & Usage page takes its **Images / Chats / Estimates counts** from the usage log and its summary. For any date range before 2 October 2026 those counts read as zero or too low. The **dollar figures** on that page come from wallet rows, which are never truncated, and are correct for every period.
- The 'generated but never charged' check (report query 6) can only see from 1 October 21:00 UTC onwards.

Fix made on 31 October 2026

- Database: a new migration (20261031120000_keep_ai_usage_logs_out_of_truncate.sql) redefines truncate_log_tables() so it truncates only client_activity_logs and analytics_events. ai_usage_logs is no longer touched by the 30-day job.
- Edge function archive-and-truncate-logs: ai_usage_logs removed from the table list it snapshots and truncates.
- From now on ai_usage_logs is governed only by the 90-day archive: detailed rows are kept for 90 days, then rolled into the monthly summary table (counts per client, feature and month). The wallet rows remain the permanent per-request record of cost.

The change must be pushed so Lovable applies the migration **before 21:00 UTC on 31 October 2026**, when the job next runs; otherwise all of October's usage-log rows are wiped too. The edge function also needs redeploying. Nothing else on the platform was changed. The data lost from earlier months cannot be restored into the table from this report, but it is recoverable from the zipped files in jewlx-backups/logs-archive/ if ever needed.

7. How this report was produced and how to read it

Source

All figures come from **wallet_transactions**, the table where every AI charge is written. It is the only complete source: it is never truncated, and each image writes one row (or two rows with the same reference when the charge was split between free credits and the wallet). Images are counted as distinct references, so a split image counts once. The queries are saved in docs/AI-Image-Generation-Report.sql (queries 0 to 8) and the raw results in docs/QueryResults/.

Column definitions

Column	Meaning
Images	Distinct image generations (ring preview, grillz preview, custom-enquiry preview). Chat replies and cost estimates are not included.
Charged	What the client was billed at the client price (base cost x multiplier from AI Cost settings; $0.04 x 1.8 = $0.072 today).
Free credits	The part of Charged that came out of the monthly free allowance. This is cost JewlX absorbs.
From wallet	The part of Charged that came out of credits the client bought. This is the only real cash.
Free / Paid / Split	Images whose cost was entirely free credits / entirely wallet / partly each (the one image where free credits ran out).
Supplier est.	Charged divided by the current image multiplier (1.8). The platform does not store what the AI supplier billed per request, so this is an estimate, slightly high for March-April (different multiplier) and for cached images (no supplier call).
Net	From wallet minus Supplier est.: roughly what JewlX kept or lost on images that month.
Month	Calendar month in UTC.

Cross-check with the Revenue & Usage page

The IRIS FINE JEWELS card on the Revenue & Usage page shows Cost $92.30, free credits $52.78 and wallet $39.53. This report, built independently from the raw rows, gives 1,282 images, $92.30, $52.78 and $39.53: an exact match. The page's dollar figures can be trusted; only its request counts for older periods are affected by the retention problem in section 6.
